

USER GUIDE

Amplify Training & Development

For Managers & Trainees

Everything you need to learn, track, and manage training in the app — from taking your first quiz to enrolling your whole team in a class.

Works on any phone or laptop · No download required · Add to your Home Screen for the fastest access

Contents

This guide covers both roles. Trainee sections are marked **TRAINEE**, manager sections **MANAGER** — shared sections apply to both.

Getting started — logging in & signing up	3
Add Amplify to your Home Screen	4
Notifications — in-app, email & push	5
TRAINEE — My Training & taking quizzes	6
TRAINEE — Opening training material	7
TRAINEE — Achievements, points & recognition	8
Shared — Training Library & In-Class Training	9
MANAGER — Your Team & assigning training	10
MANAGER — Progress, coaching & feedback	11
MANAGER — Running in-class training	12
Account & troubleshooting	13

Logging in & signing up

Your work email is your login — no separate ID or PIN to remember.

■ First time here? Sign up

- 1 Open the app and choose the **Trainee** or **Manager** tab at the top, then tap "**Sign up for access**".
- 2 Choose whether you're applying as a Trainee or a Manager, then fill in your name, work email, department, and — if you're a trainee — your manager.
- 3 Choose a password (at least 8 characters, with an uppercase letter, lowercase letter, number, and special character).
- 4 Submit — your request goes to the training team for approval. Once approved, log in with the email and password you just chose.

■ Already approved? Log in

Choose your role tab (Trainee or Manager), enter your work email and password, and tap **Log in**. You'll stay logged in until you log out, or after 20 minutes of no activity.

Forgot your password? Tap "Forgot password?" on the login screen, enter your work email, and a new password is generated and emailed to you.

Add Amplify to your Home Screen

Once added, it opens full-screen like a regular app — no app store needed, and it's completely free.

■ iPhone (Safari)

- 1 Open the app link in **Safari**.
- 2 Tap the **Share** icon at the bottom of the screen.
- 3 Scroll down and tap "**Add to Home Screen**".
- 4 Tap **Add** in the top right.

■ Android (Chrome)

- 1 Open the app link in **Chrome**.
- 2 Tap the **⋮** menu, top right.
- 3 Tap "**Add to Home Screen**" or "**Install app**".
- 4 Confirm.

You can also open this guide anytime from inside the app — tap the phone icon next to the role switcher at the top.

Notifications — three ways, so nothing gets missed

Every important update — a new assignment, a quiz result, an upcoming class — reaches you automatically.

In-app

Tap the sparkle icon in the top header to see all your notifications. Unread ones show a red count badge and a highlighted background — opening the panel marks them as read.

Email

A short email is sent alongside every in-app notification, so you'll know even when you're not in the app.

Push notifications

Once enabled, alerts appear directly on your phone or laptop — even when the app is closed. Tap "**Enable push notifications**" next to your name at the top and allow the permission prompt.

On iPhone: push notifications only work after you've added Amplify to your Home Screen and opened it from that icon — Safari tabs can't receive them. This is an Apple restriction, not an app limitation.

Step-by-step: getting notifications from your Home Screen icon

- 1 Add Amplify to your Home Screen** first (see the previous page) — this step matters most on iPhone, where it's required before push will work at all.
- 2 Open the app from that Home Screen icon**, not from a browser bookmark or tab.
- 3** Log in, then tap "**Enable push notifications**" next to your name at the top.
- 4** Allow the permission prompt your phone shows you.

Once enabled, you'll get an alert on your lock screen or notification center when something happens — an assignment, a quiz result, an upcoming class. This is a standard notification alert, the same kind any app sends; it's not a small number badge sitting permanently on the app icon itself, which is a separate feature most browsers don't yet support for installed web apps like this one.

My Training & taking quizzes

Every module assigned to you lives in one place, with real progress tracking.

Studying a module

Tap **Study** on any module to open it — a live timer tracks your actual active time and pauses automatically if you switch tabs. Close it anytime with "Done studying for now"; your time and progress are saved.

A module on your My Training tab — passing score, due date, attempts, and actual study time all shown right on the card.

Taking the quiz

Tap **Take quiz** once you're ready. You'll see how many questions remain as you go, and can only submit once you've answered every question.

RULE	WHAT IT MEANS
Passing score	Set by your manager per assignment — shown right on the module card
Attempts	You get 3 tries; falling short restarts the module and keeps your attempt count
3rd miss	Automatically flagged to the admin team so you get extra support

Due dates: if your manager sets one, it shows on the module card — and turns red if it's passed without being completed.

Opening training material

Files open right inside the app — nothing downloads to your device.

■ Tap any attached file

Wherever you see a file — on a module card, inside the Study view, or in the Training Library — tap it to open the in-app viewer.

FILE TYPE	WHAT HAPPENS
PDF	Renders directly in the viewer
Images	Displays inline
Word / PowerPoint / Excel	Opens in a built-in document viewer — no download

Want it outside the app? Every viewer has an "Open in new tab" link if you need it.

Achievements, points & recognition

Training progress earns real recognition, visible to the whole team.

■ Levels & points

Earn points for every completed module. Levels: **Starter** → **Bronze (100)** → **Silver (300)** → **Gold (600)**. Your streak grows with every quiz you pass.

■ Milestone badges

Perfect Score, On Fire (5-day streak), Module Master (3+ completions), and Quiz Ace (two 90%+ scores) all unlock automatically.

■ Top Employee of the Month

The highest scorer in your department each month is eligible — once your manager endorses you, it's announced on your Achievements tab for everyone to see.

■ Celebrations & leaderboard

Admin-posted celebrations and the company leaderboard both appear right on your Achievements tab.

Training Library & In-Class Training

■ Training Library

Browse every training module the admin team has published, newest first — even ones not assigned to you. It's how you get ahead, or how a manager finds something to assign.

■ In-Class Training calendar

Both roles see the full calendar of instructor-led sessions. Tap a date with a session, or use the list of classes below the calendar for an easier tap target on mobile.

YOU'LL SEE	DETAILS
Trainer	Who's delivering the session
Slots	"X of Y filled" if the class has a capacity limit
Hours logged	Session dates and hours as they happen
Quiz score	If the class includes an in-class quiz

Your Team & assigning training

My Team

See every direct report's level, points, and badge. If someone's currently #1 in their department, you can endorse them as Top Employee of the Month right from their card.

The Manager tab bar and a team member card — scroll the tab bar sideways to reach Coaching, Feedback, and Activity Log.

Assigning training

- 1 Go to **Assign Training**. Check the box next to each person — or tap "**Select whole team**" to assign everyone at once.
- 2 Pick the module, set the required **passing score**, and optionally a **due date**.
- 3 Tap **Assign** — you'll see a confirmation showing exactly how many people it went to.

Each person gets 3 quiz attempts. A 3rd miss automatically escalates to the admin team — you'll also see it in Coaching & Comments.

Progress, coaching & feedback

■ Progress tab

Every assignment for your team, with live progress, time spent, due dates (overdue ones highlighted), and quiz scores. Send a one-tap reminder, or remove an assignment if it's no longer needed.

■ Coaching & Comments

Log a coaching session for anyone on your team — category, notes, and date. If something needs the admin team's attention, escalate it directly from the session.

■ Monthly Feedback

Submit feedback for each team member every month — flag if they need more training, and add general comments plus development notes. A banner reminds you during deadline week (the 3rd week of each month).

Running in-class training

■ Enrolling your team

Open a class from the calendar and use the dropdown to enroll anyone on your team. If the class has a slot limit and it's full, enrollment is disabled with a clear message — the admin team sets and can adjust that limit.

■ Requesting a new class

Can't find what your team needs? Fill in the title, reason, and a suggested date on the In-Class Training tab — the admin team approves or declines it, and it's added to the calendar automatically if approved.

■ Reminders & scores

Send a reminder to anyone enrolled who hasn't attended yet, and view their in-class quiz score once the admin team scores it.

Account & troubleshooting

■ Changing your password

Tap "Change password" next to your name at the top, enter your current password and a new one meeting the requirements, and confirm.

■ Forgot your password?

On the login screen, tap "Forgot password?", enter your work email, and a new password will be emailed to you automatically.

■ Something looks wrong?

If the app ever hits an unexpected error, you'll see a clear message and a reload button — never a blank screen. Reloading usually resolves it. If it keeps happening, let the admin team know.

Questions this guide doesn't cover? Reach out to your training team directly.
